

		Standard in progress: ISO/CD 15713-06/99
19	Polveri totali (come base per calcolare PM10)	<p>UNI 10263 – Misure alle emissioni. Determinazioni della concentrazione delle polveri nei flussi gassosi convogliati – Metodo gravimetrico con sonda semplice</p> <p>PrEN 13284 (draft) - Stationary source emission –Determination of the mass concentration of total dust at low concentration (< 20mg/m³)</p> <p>ISO 9096/06.92 - Stationary source emission – Determination of concentration and mass flow rate of particulate material in gas-carrying ducts – Manual gravimetric method (> 50mg/m³)</p> <p>ISO 10155/04.95 - Stationary source emission – Automated monitoring of mass concentration of particles – performance characteristics, test methods and specifications</p> <p>EPA METHOD 5 - Determination of particulate matter emissions from stationary sources</p> <p>EPA METHOD 17 - Determination of particulate matter emissions from stationary sources</p> <p>EPA METHOD 201 - Determination of PM 10 emissions (Exhaust Gas Recycle Procedure)</p>
